

IMPORTANT TRASH PICKUP INFORMATION

Correct placement of trash toters on street with curb (above) and street without curb. The arrows located on the lid of your totter (shown at right) should be **pointing toward the street**. Make sure, also, that your totter is placed well away from any other object, such as a mailbox or another vehicle.

When you place your trash totter out for collection, please make sure the arrows on top of the lid are **pointing toward the road**. This is critical, because the new automated refuse trucks cannot pick up your trash if your totter is facing the wrong way! See photos above for proper placement.

Also, please make sure your totter is placed **at least three feet away** from any other structure or obstacle, such as a mailbox or a vehicle.

Thank you for your help! Please call us at 890-3780 if you have any questions.
